

CONTENTS.

Opening Address, Session 1869-70. By the Hon. Lord Neaves, Vice-President,	2
On the Geological Structure of some Alpine Lake-Basins. By Archibald Geikie, Esq., F.R.S.,	33
Preliminary Notice of the Great Fin Whale, recently stranded at Longniddry. By Professor Turner,	34
Note on Aggregation in the Dublin Lying-in Hospital. By Dr Matthews Duncan,	38
On a Method of Economising our Currency. By Andrew Coventry, Esq.,	39
On the Old River Terraces of the Earn and Teith, viewed in connection with certain Geological Arguments for the Antiquity of Man. By the Rev. Thomas Brown, Edinburgh,	41
Experiments on the Colorific Properties of Lichens. By W. Lauder Lindsay, M.D., F.R.S.E., F.L.S.,	43
On the Principles of Scientific Interpretation in Myths, with Special Reference to Greek Mythology. By Professor Blackie,	44
On Reciprocal Figures, Frames, and Diagrams of Forces. By J. Clerk Maxwell, Esq., F.R.S.S. L. & E.,	53
On the Extension of Brouncker's Method. By Edward Sang, Esq.,	56
On the Forces experienced by Solids immersed in a Moving Liquid. By Sir William Thomson,	60
On the Equilibrium of Vapour at a Curved Surface of Liquid. By Sir William Thomson,	63
On a Bow seen on the Surface of Ice. By J. Clerk Maxwell, Esq., F.R.S.S. L. & E.,	69
Note on the Atomic Volume of Solid Substances. By James Dewar, Esq., Lecturer on Chemistry, Veterinary College, Edinburgh,	70
Note on Inverted Sugar. By James Dewar, Esq., Lecturer on Chemistry, Veterinary College, Edinburgh,	77
On the Flow of Electricity in Conducting Surfaces. By W. R. Smith, M.A., Assistant to the Professor of Natural Philosophy in the University of Edinburgh. Communicated by Professor Tait. (With a Plate.)	79
On the Kombi Arrow-poison (<i>Strophanthus hispidus</i> , DC.) of the Manganja district of Africa. By Dr Thomas R. Fraser,	99
On Thebo-lactic Acid. By J. Y. Buchanan, M.A.,	103
On the Bones of a Seal found in Red Clay near Grangemouth, with Remarks on the Species. By Professor Turner,	105
On the Rate of Mortality of Assured Lives as experienced by Ten Assurance Companies in Scotland from 1815 to 1863. By James Meikle, Esq. Communicated by Professor Tait,	115
Notes on Indian Society and Life in the Age when the Hymns of the Rigveda were composed. By John Muir, D.C.L., LL.D., Ph.D.,	119
On the Lake Basins of Eastern Africa. By Keith Johnston, Jun., Esq., F.R.G.S.,	122
On the Steady Motion of an Incompressible Perfect Fluid in Two Dimensions. By Professor Tait,	142

On the most general Motion of an Incompressible Perfect Fluid. By Professor Tait,	143
Address by Professor Wyville Thomson on the "Condition of the Depths of the Sea,"	144
Facts as to Brain-Work; in Illustration of the New and Old Methods of Philosophical Inquiry in Scotland. By Thomas Laycock, M.D.,	145
On Change of Apparent Colour by Obliquity of Vision. By Robert H. Bow, C.E., F.R.S.E.,	155
Remarks on the Theories of Capillary Action. By Edward Sang, Esq., F.R.S.E.,	160
Theory of Construction of the Great Pyramid. By John Christie, Esq. Communicated by the Rev. W. Lindsay Alexander, D.D.,	162
On the Structure of Tubifex. By W. C. McIntosh, M.D.,	166
Primitive Affinity between the Classical and the Low German Languages. By the Hon. Lord Neaves,	167
On the Genetic Succession of Zooids in the Hydroids. By Professor Allman,	168
On Green's and other Allied Theorems. By Professor Tait,	168
Proposed Method of ascertaining the Temperature of Falling Rain. By Thomas Stevenson, F.R.S.E., Civil Engineer,	170
Letter from Professor W. J. Macquorn Rankine as to Diagrams of Forces in Framework,	171
On Spectra formed by Doubly Refracting Crystals in Polarised Light. By Francis Deas, LL.B., F.R.S.E.,	172
On the Heat Disengaged in the Combination of Acids and Bases. Second Memoir. By Thomas Andrews, M.D., F.R.S., Hon. F.R.S.E.,	174
Note on Professor Bain's Theory of Euclid I. 4. By Wm. Robertson Smith, M.A., Assistant to the Professor of Natural Philosophy. Communicated by Professor Tait,	176
A Simple Mode of Approximating to the Wave-Length of Light. By W. Leitch, Assistant to the Professor of Natural Philosophy in the University of Glasgow. Communicated by Professor Tait,	179
Note on Linear Partial Differential Equations. By Professor Tait,	190
On the Oxidation Products of Picoline. By James Dewar, F.R.S.E., Lecturer on Chemistry, Veterinary College, Edinburgh,	192
Notes of some Experiments on the Rate of Flow of Blood and some other Liquids through tubes of narrow diameter. By J. Matthews Duncan, M.D., F.R.S.E., and Arthur Gamgee, M.D., F.R.S.E.,	193
On Cystine ($C_3H_7NO_2S$). By James Dewar, F.R.S.E., Lecturer on Chemistry, Veterinary College, Edinburgh, and Arthur Gamgee, M.D., F.R.S.E., Lecturer on Physiology, at Surgeon's Hall, Edinburgh,	201
Notes from the Physical Laboratory of the University. By Professor Tait. (With a Plate),	206
Donations to the Society,	209
Opening Address, Session 1870-71. By David Milne Home, Esq.,	232
Additional Remarks on the Theory of Capillary Attraction. By Edward Sang, Esq.,	308
Laboratory Notes: On Thermo-Electricity. By Professor Tait,	308
Note on Linear Differential Equations in Quaternions. By Professor Tait,	311
On some Quaternion Integrals. By Professor Tait,	318
Note on an Ice Calorimeter. By Dr A. Crum Brown,	321
Address "On the Educational System of Prussia." By Principal Sir Alex. Grant, Bart.,	309

On the Physiology of Wings: being an Analysis of the Movements by which Flight is produced in the Insect, Bat, and Bird. By James Bell Pettigrew, M.D., F.R.S. Communicated by Professor Turner,	336
Address on "The Results of the More Recent Excavations on the Line of the Roman Wall in the North of England." By Dr J. Collingwood Bruce,	350
Note on two Species of Foraminifera, and on some Objects from the Nicobar Islands of great Ethnological interest. By T. C. Archer, Esq.,	353
Certain Phenomena applied in Solution of Difficulties connected with the Theory of Vision. By R. S. Wyld, Esq.,	355
Additional Note on the Motion of a Heavy Body along the Circumference of a Circle. By E. Sang, Esq.,	361
On the Capture of a Sperm Whale on the Coast of Argyleshire, with a Notice of other Specimens caught on the Coast of Scotland. By Professor Turner,	365
On the Efficient Powers of Parturition. By Dr J. Matthews Duncan,	370
On the Pentatonic and other Scales employed in Scottish Music. By the Hon. Lord Neaves,	382
On the Motion of Free Solids through a Liquid. By Sir William Thomson,	384
Laboratory Notes. By Professor Tait—	
1. On Thermo-electricity,	390
2. On Phyllotaxis,	391
Account of the Extension of the Seven-Place Logarithmic Tables, from 100,000 to 200,000. By Edward Sang, Esq.,	395
On the Place and Power of Accent in Language. By Professor Blackie,	395
Notice of Exhibition of Vegetable Spirals. By Professor Alexander Dickson,	397
On the Old River Terraces of the Spey, viewed in connection with certain proofs of the Antiquity of Man. By the Rev. Thomas Brown, F.R.S.E.,	399
On the Gravid Uterus and Arrangement of the Foetal Membranes in the Cetacea. By Professor Turner,	407
Note on some Anomalous Spectra. By H. F. Talbot, Hon. F.R.S.E.,	408
Laboratory Notes. By Professor Tait—	
1. On Anomalous Spectra, and on a simple Direct-vision Spectroscope,	410
2. On a method of illustrating to a large Audience the composition of simple Harmonic Motions under various conditions,	412
3. On a simple Mode of explaining the Optical Effects of Mirrors and Lenses,	412
On the Structure of the <i>Palæozoic Crinoids</i> . By Professor Wyville Thomson,	415
On the Formation and Decomposition of some Chlorinated Acids. By J. Y. Buchanan, A.M.,	419
Notes on the Antechamber of the Great Pyramid. Based on the Measures contained in vol. ii. "Life and Work at the Pyramid," by C. Piazzzi Smyth. By Captain Tracey, R.A. Communicated by St John Vincent Day, C.E., F.R.S.E.,	422
Experiments and Observations on Binocular Vision. By Edward Sang, Esq.,	433

On the Fall of Rain at Carlisle and the neighbourhood. By Thomas Barnes, M.D.,	434
Mathematical Notes. By Professor Tait—	
1. On a Quaternion Integration,	434
2. On the Ovals of Descartes,	436
On the Remarkable Annelida of the Channel Islands, &c. By W. C. M'Intosh, M.D.,	438
Note. On the Use of the Scholastic Terms <i>Vetus Logica</i> and <i>Nova Logica</i> , with a Remark upon the corresponding Terms <i>Antiqui</i> and <i>Moderni</i> . By Thomas M. Lindsay, M.A., Examiner in Philosophy to the University of Edinburgh,	441
On some Abnormal Cones of <i>Pinus Pinaster</i> . By Professor Alexander Dickson,	449
Address on Spectrum Analysis. By Professor Tait,	455
Note on the Early History of Spectrum Analysis. By H. Fox Talbot, Hon. F.R.S.E.,	461
On some Optical Experiments. By H. F. Talbot, Hon. F.R.S.E.—	
1. On a New Mode of observing certain Spectra,	466
2. On the Nicol Prism,	468
Note on a New Scottish Acidulous Chalybeate Mineral Water. By James Dewar, F.R.S.E.,	470
On the Homologies of the Vertebral Skeleton in the Osseous Fishes and in Man. By Professor Macdonald,	472
Scheme for the Conservation of Remarkable Boulders in Scotland, and for the Indication of their Positions on Maps. By D. Milne Home, Esq.,	475
Note of a New Form of Armature and Break for a Magneto-Electric Machine. By R. M. Ferguson, Ph.D.,	488
Mathematical Notes. By Professor Tait—	
1. On a Property of Self-Conjugate Linear and Vector Functions,	498
2. Relation between corresponding Ordinates of two Parabolas,	499
3. On some Quaternion Transformations,	501
4. On an Expression for the Potential of a Surface-distribution, &c.,	503
An Experimental Research on the Antagonism between the Actions of Physostigma and Atropia. By Dr Thomas R. Fraser. (With a Diagram),	506
On the Homological Relations of the Coelenterata. By Professor Allman, F.R.S.E.,	512
Donations to the Society,	514
Opening Address, Session 1871-72. By Sir Robert Christison, Bart.	531
On the Computation of the Strengths of the Parts of Skeleton or Open Structures. By Edward Sang,	575
On Vortex Motion. By Professor Sir William Thomson,	576
On the Ultramundane Corpuscles of Le Sage. By Professor Sir W. Thomson,	577
Note on Spherical Harmonics. By Professor Tait,	589
Laboratory Notes: On Thermo-Electricity. By Professor Tait,	597
On the Relation of Magnetism to Temperature. By D. H. Marshall, Esq., M.A., Assistant to the Professor of Natural Philosophy.	
Communicated by Professor Tait. (With a Plate),	603
Note on a Singular Property of the Retina. By Professor Tait,	605
On the Operator $\phi(\nabla)$. By Professor Tait,	607
Note on Pendulum Motion. By Professor Tait,	608

On the Decomposition of Forces externally applied to an Elastic Solid. By W. J. Macquorn Rankine, C.E., LL.D., F.R.SS. Lond. & Edin.,	611
On Geometric Mean Distance. By Professor Clerk Maxwell,	613
On a Singular Case of Rectification in Lines of the Fourth Order. By Edward Sang, Esq.,	613
On the Wheeling of Birds. By Professor Fleeming Jenkin,	615
Notice of a New Family of the Echinodermata. By Professor Wyville Thomson, LL.D., F.R.SS. L. & E., F.L.S., F.G.S.,	615
On the Principles which regulate the Incidence of Taxes By Pro- fessor Fleeming Jenkin,	618
Additional Notes on the Occurrence of the Sperm Whale in the Scot- tish Seas. By Professor Turner,	632
Address on Thermo-Electricity. By Professor Tait,	644
Note on Cystine. By James Dewar, F.R.S.E.,	644
Remarks on Contact-Electricity. By Sir William Thomson,	648
On the Curves of the Genital Passage as regulating the movements of the Fœtus under the influence of the Resultant of the Forces of Parturition. By Dr J. Matthews Duncan,	648
On a Method of Determining the Explosive Power of Gaseous Com- binations. By James Dewar, Esq.,	662
Note on Sprengel's Mercurial Air-Pump. By James Dewar, Esq.,	662
Exhibition of a large series of abnormal cones of <i>Pinus Pinaster</i> . By Professor Alexander Dickson,	663
On the Connection between Chemical Constitution and Physiological Action— <i>Continued</i> . On the Physiological Action of the Salts of Trimethylsulphin. By Professor Crum Brown and Dr Thomas R. Fraser,	663
On the Mean Monthly Rainfall of Scotland. By Alexander Buchan,	665
Note on the Strain Function. By Professor Tait,	667
On the Motion of Rigid Solids in a Liquid circulating Irrotationally through Perforations in them or in any Fixed Solid. By Sir Wil- liam Thomson,	668
On the Extraction of the Square Root of a Matrix of a Third Order. By Professor Cayley,	675
Second Note on the Strain Function. By Professor Tait,	682
Note on the Rate of Cooling at High Temperatures. By Professor Tait,	682
Notice of a Large Boulder in the Parish of Rattray, and County of Perth, having on one of its sides Cups and Grooves, apparently artificial. By D. Milne Home,	682
On the Fruiting of the Ipecacuan Plant (<i>Cephaelis Ipecacuanha</i> , Rich.) in the Royal Botanic Garden. By Professor Balfour,	688
On Cardiocarpon. By Professor Duns, D.D., F.R.S.E., New College,	692
On the Composition of the Flesh of the Salmon in the "Clean" and "Foul" condition. By Sir Robert Christison, Bart.,	694
On Recent Estimates of Solar Temperature. By James Dewar, Esq.,	697
On the Temperature of the Electric Spark. By James Dewar, Esq.,	699
On the Action of Water on Lead. By Sir Robert Christison, Bart.,	699
On the Preservation of Iron Ships. By James Young, Esq. of Kellie,	702
First Report by the Committee on Boulders appointed by the Society,	703
On the Chemical Efficiency of Sunlight. By James Dewar, Esq.	751
On the Rainfall of the Continents of the Globe. By Alexander Buchan, Secretary of the Scottish Meteorological Society, A.M.,	755
On the Lunar Diurnal Variation of Magnetic Delineation at Trevan- drum, near the Magnetic Equator. By J. A. Broun, F.R.S.,	756

Some Helps to the Study of Scoto-Celtic Philology. By the Hon. Lord Neaves,	758
Some Observations on the Dentition of the Narwhal (<i>Monodon monoceros</i>). By Professor Turner,	759
On the Occurrence of <i>Ziphius cavirostris</i> in the Shetland Seas, and a comparison of its Skull with that of Sowerby's Whale (<i>Mesoplodon Sowerbyi</i>). By Professor Turner,	760
On the Maternal Sinus Vascular System of the Human Placenta. By Professor Turner,	760
On Dimorphic Flowers of <i>Cephaelis Ipecacuanha</i> , the Ipecacuan Plant. By Professor Balfour,	763
On the Crinoids of the "Porcupine" Deep-Sea Dredging Expedition. By Professor Wyville Thomson,	764
Laboratory Notes. By Professor Tait—	
On Thermo-electricity: Circuits with more than one Neutral point. (With a Plate).	773
On a Method of Exhibiting the Sympathy of Pendulums,	779
On some Quaternion Integrals. Part II. By Professor Tait,	784
On the Currents produced by Contact of Wires of the same Metal at Different Temperatures. By W. Durham, Esq. Communicated by Professor Tait,	788
Remarks on the Deep-Water Temperature of Lochs Lomond, Katrine, and Tay. By Alexander Buchan, A.M.,	791
Donations to the Society,	796
Index,	821
